

Scholar

A Scholar is accurate, reserved, imaginative and seeks a high level of technical expertise.

NEEDS:

Independence

Opportunities to reflect

Stable work environment

Freedom from risk of error

BEHAVIORS:

Autonomous

Introspective

Deliberate

Reserved

Average Behavioral Pattern

Motivate and recognize

- Give them autonomy in their defined area of responsibility.
- Involve them in technical, tangible work.
- Provide private recognition of their depth of their knowledge or technical expertise, thoughtful decision making and quality of work.

Provide direction and feedback

- Provide clarity of expectations, including the process, time and/or effort required.
- Keep feedback factual and to the point.
- Allow them time to think about the feedback or directions and circle back with questions if needed.

Delegate

- Don't delegate someone else's work or work that is subject to urgent time pressures.
- Do delegate structured, analytical work that allows them to learn in depth about a subject or show off their own expertise.

Coach

Coaching is not the same as managing, but we know that managers often play a coaching role. Keep in mind that coaching conversations are about asking questions and letting the coachee come up with ideas, actions and next steps.

- Encourage them to be more flexible in their approach, rather than having to follow a step-by-step process.
- Work with them to identify what would make them comfortable with moving quickly or taking action without all of the information.
- Identify situations where reaching out to the team could benefit their own work or the work of others; they likely have a lot to teach.
